

Mat layers and spacer tabs

buzonpedestals.com

Buzon® solves and secures the problem of "low heights" under pavers. The combination of the **U-TABS-FLAT**, **U-PAD-GROUND** and **U-PAD** accessories helps to build terraces when the height available under the paver is limited to between 3 and 17 mm. The system provides a flat terrace with good distribution of the laying surface (the pavers are "held" better).
